EASY collection

[En] → **Suspended light.**

Simplicity and essential look are interpreted by the simple gesture of fitting a lamp in a lampholder, EASY is infact made of 3 simple elements: lamp, lampholder and metallic diffuser.

This last component rests on the light source reflecting downwards, greatly reducing the possibility of glare.

The lamp is suspended from the power feed which is dressed with a braided cover of the same color of the lampholder and diffuser, the shape of the diffuser is reflected in the ceiling rose.

[En] → The conical shape of the diffuser, besides being the formal element which characterizes the lamp, also has a very important functional role: it avoids the light source glare and at the same time reflects and directs the light downward. The new technology allows the use of a light source that is able to combine the beauty and shape of the classic E 27 INC, with the LED light efficiency.

[It] → La forma conica del diffusore, oltre ad essere l'elemento formale che caratterizza la lampada, ha anche un ruolo funzionale molto importante: evitare l'abbagliamento dato dalla sorgente luminosa e allo stesso tempo riflettere ed indirizzare la luce verso il basso. La nuova tecnologia, permette di utilizzare una sorgente luminosa che sa unire alla bellezza e forma della classica E 27 INC, l'efficienza luminosa del LED.
